FICHA TÉCNICA TECHNICAL INFORMATION SHEET

PRODUCT CODE
01718

FAMILY
industrial hand wash
disinfectant

REMOVES LEAD

chemically and mechanically

DOES NOT ATTACK THE SKIN

It does not contain solvents

PROTECTS HANDS

Throughout softening
substances and natural
moisturizing

HIGH CONTENTS OF ACTIVE MATERIAL

Ensures a deep cleaning and
disinfection of your skin,
ensuring effective removal of
heavy metals, especially lead

The information contained in this
document is based on our
experience, which however does
not replace the necessity of
conduction of preliminary tests,
since the product application
conditions are beyond our control.
The CIMAI only be responsible for
maintaining the characteristics of
the products according to our
specification.

INDUCIM PB

Industrial hand wash disinfectant for hand wash and disinfection and removal of lead and other heavy metals

PROPERTIES:

Yellowish liquid, medium viscosity, acid pH, with lemon aroma, constituted by a mixture of surfactants, sequestrant of heavy metals, softeners, moisturizing and bactericidal. The INDUCIM PB contains agents in suspension which also allow mechanical removal of contamination, thus ensuring a high efficiency in decontamination.

RECOMMENDED USE:

High concentrations of lead in the blood are causing deep depressions, insomnia, irritability, concentration problems, nausea, sexual dysfunction and motor coordination problems. Studies show that lead levels above 2 micrograms / deciliter of blood dramatically increase the risk of heart disease and heart attack, being directly associated with increased blood pressure, osteoporosis and renal failure. Once lead absorbed into the bloodstream, it will be stored in bones, what keeps us exposed even after failing to be facing a source of active exposure. INDUCIM PB is recommended in

all industries where there is contact with heavy metals, especially with lead. It is applicable in battery plants, mining and smelting.

APPLICATION MODE:

Spread in our hands an amount of INDUCIM PB, rub, rinse with water. If the contamination is strong must be repeated washing as often as necessary. The Product must be used in industrial dispensers.

Exposed workers should wash their hands frequently, particularly in the intervals and at the end of the shift.

PRECAUTIONS:

Does not require special care.

STORAGE:

Does not require special care.

CLASSIFICATION:

Please consult Safet Data Sheet.

PACKAGING:

5 Kg (Product code 00622)
125 Kg (Product code 00621)
